A STRONG PLEA.

National Master Bachelder Before Ways and Means Committee.

A strong plea for denaturized alcohol was made by National Master Bachelder at Washington before the ways and means committee recently. He gave a number of reasons why Patrons of Husbandry, with a membership of 800,000, representing the organized farmers of the entire country, are actively urging upon congress the enactment of legislation providing for the use, free of tax, of domestic alcohol, which has been rendered unfit for internal use by the mixture of some noxious substance. The great importance to agricultural interests of the proposed legislation rises from two comparatively recent discoveries—first the invention of a method to use alcohol in connection with the incandescent mantle for lighting purposes, and second, the perfection of the internal combustion engine and its general adoption as a motive power for motor vehicles, farm engines, etc.

Authorities state that a little more than two and a half gallons of 90 per cent alcohol, the strength which has been found most suitable for lighting and motor fuel purposes, can be produced from each bushel of corn. This estimate is confirmed by the report of the commissioner of internal revenue, showing the quantity of distilled spirits produced from corn, barley rye, etc. With corn costing the distiller 35 cents a bushel the cost of alcohol would be 14 cents a gallon, and at 40 cents a bushel alcohol would cost 16 cents a gallon. It is estimated that the value of the byproducts of the corn after the alcohol is extracted is about sufficient to pay the cost of distillation. Co-operative distilleries for the sole purpose of producing denaturized industrial alcohol could be established by the farmers and by this means create a greater outlet for such commodities as corn, potatoes, sorghum, etc. In this way the cost to the farmers of this material for lighting, heating, cooking and motor fuel purposes could be kept at the least possible point.

Closing his address, National Master Bachelder stated that the farming interests of the country heartily and earnestly favor legislation which will give them this material for lighting, heating, cooking and for motor fuel, this to be distilled from the products of their farms, which will give them larger additional markets for surplus farm products and which will promote manufacturing interests and increase domestic and export trade.

Hall First, Grange Afterward.

The farmers of West Greene, Erie county, Pa., believed in having a place wherein to locate a grange before organizing one, so they set about erecting a new hall 30 by 60 feet and three stories high, the grange hall proper being on the third floor. The second floor is used for a reception room, kitchen and dining room and the first floor for general purposes. Then they went to work and organized a grange of seventy-seven charter members and have a complete new set of court robes and officers' regalia

DESIGN AND DURABILITY UNSURPASSED — TRADE Standard MARK

Kitchen Troubles and the Remedy

An error commonly made by home owners is in underestimating the necessity of proper sanitary equipment for the kitchen.

Only a few years ago it was considered good form to encase the sink in wood thereby concealing the trap, making it inaccessible and offering a place for the collection of filth and vermin. If this condition exists in your household, examine into it and learn the true state of affairs.

Do not lose sight of the fact that your food is prepared in the kitchen and the utensils in which it is prepared depend on the sanitary arrangements for cleanliness, therefore safeguardagainst contamination of either food or utensils.

The most certain way to do this is to employ us to install a snowy white, spotlessly clean, "Standard" Porcelain Enameled Kitchen Sink. You will find it a remedy for kitchen troubles.

FRUIT AND FLOWERS

PEACH BELLS POPULAR.

The White Peach Leaved Campanula In Hardy Gardens.

The accompanying figure shows a remarkably well grown plant of white peach leaved bellflower, Campanula persicifolia alba, a native of Europe, but long cultivated in gardens, of which Rural New Yorker says:

This variety grows two or three feet high and bears a great profusion of large blooms, broader and more open than those of the common Canterbury bells, C. medium. While the plant is perennial, it is best treated in this country as biennial, sowing the seeds

PEACH LEAVED CAMPANULA.

one year to secure flowering plants the next. Plants often live many years, as they are quite hardy, but somehow the bloom spikes do not amount to much after the second season.

Mixed seeds of the peach leaved campanula, often called peach bells as a handy garden name, may be had for 10 cents the packet. They should be sown outside in May or June and transplanted to the border any time after July, choosing, if possible, deep, rich soil and setting the plants sixteen inches or more apart. The colors to be expected are various shades of blue and white.

Peach bells are now in high favor for hardy plant collections and are freely offered by plant dealers. There are several large flowered varieties, the best of which appears to be Gigantea moerheimi, producing large spikes of white double camellia formed flowers up to two and one-half inches in diameter and blooming from May until July.

EASTER'S BLOOM.

Some of Its Charms of Fragrance, Color and Form.

The rich and the poor must have Easter flowers. The gems of the flower grower's skill and the wonders of the world are the offerings for the day. We cannot name the acres of glass in this country devoted to the growing of Easter flowers, to say nothing of importations from across the ocean.

A late Easter has set an easy pace for the florists this year and added to the glory of the annual display. Crocuses, tulips, hyacinths, daffodils and paper white narcissuses give their welcome cheer and help one to forget winter cold and March winds.

Pansies, violets and primroses wipe out the memories of past dreariness and lead gently up to the greater glory of the lilies, the roses and the irises.

Lilies in pots furnish fine specimen plants. Some florists make up a number of pans of five, seven or more plants of Easter lilies that answer to a special need, giving a superb and massive effect in decoration.

Hydrangeas, azaleas and bougainvillaeas remain useful Easter plants. Among azaleas Julius Roelus is of an intense coloring, excelling in that respect perhaps any of the popular varieties.

To the lover of roses comes no handsomer Easter gift than a potted American Beauty, and the growing of this rose for the great floral festival of spring is simplicity itself. Magna Charta, too, is an exceedingly beautiful rose for Easter bloom, while the baby crimson rambler bush finds many admirers.

The Boston fern and all its later variations make a splendid show.

Cinerarias and calceolarias appear to be ideal for buyers who want big show for small money.

Where Callas Are Grown.

In southern California the calla is grown in fields for commercial purposes. The cut flowers are in great demand. At Eastertide tens of thousands of the long stemmed callas are used in flower schemes. The lessons learned in the field growing of callas are applicable to the pot culture of this very responsive plant. The semiaquatic nature of the calla demands constant moisture. In the fields irrigation answers its every demand. In pots or tubs the same principle is applied.—Floral Life.

Earth's Deathless Flowers.

The lily's lips are pure and white,
Without a touch of fire:
The rose's heart is warm and red
And filled with sweet desire.
In earth's broad field of deathless bloom
The gladdest lives are those
Whose lips are like the lily's
And whose hearts are like the rose.

How charming a veranda may be rendered by the use of climbing plants of various kinds. Pray don't forget it until planting time is past.

Maurandia is a pretty vine for trailing over low walls or for climbing trellises.

Oleanders, Cape jasmines, ivy and tradescantia can be rooted in water. Forgetmenots are also sometimes grown in this way.

PRESS NOTES

Heavy hauling cheaply done. Regular trips to San Jose. Call on L. J. Stratton or leave word at Farmers Union.

Take your prescriptions to the Campbell Drug Store and have them put up by a registered pharmacist of over twenty years experience.

Chamberlain's Salve is good for any disease of the skin. It allays the itching and burning sensation instantly. For sale by Farmers Union, Agent.

No Effective Charity Plan Possible

.....By Sir HIRAM MAXIM, Inventor

IF the number of the unemployed, or perhaps we should say the unfit, was a CONSTANT, as they say in mathematics, then we should know exactly what we had to deal with. But, unfortunately for the taxpayer, their number is not a constant; on the contrary, IT IS AN EVER INCREASING QUANTITY.

By the aid of charity they are able to increase and MULTIPLY much more rapidly than the well to do classes. Every dollar given in charity, if applied in the ordinary way, serves not only to aggravate the trouble by INCREASING the number of the unemployed, but at the same time it serves to diminish the birth rate of those who have to pay the taxes.

THE MAN DOES NOT LIVE WHO CAN SUGGEST A PLAN FOR RELIEVING THE POOR WHICH DOES NOT AGGRAVATE THE TROUBLE AND MAKE IT WORSE. WE MAY GO ON FOR YEARS AND CONTINUE TO CONTRIBUTE EVER INCREASING SUMS FOR THE SUPPORT AND INCREASE OF THE UNFIT, BUT THE TIME MUST EVENTUALLY ARRIVE WHEN WE GET TO THE END OF OUR TETHER.

We shall have bred such a vast horde of the worthless, the lazy and the unfit that they will completely OVERWHELM us. The laws of nature are such that if the individual sins the individual has to suffer, but if the nations sin, as THEY ARE SINNING AT THE PRESENT TIME, by the artificial production of a vast number of unfit citizens, then the nations must suffer.

The Proper Place of Athletics In High School Life

By FASSETT A. COTTON, Indiana Superintendent of Public Instruction

THE TENDENCY on the part of the high schools TO APE COLLEGE LIFE is to be discouraged always, for the reason that most frequently the least desirable phases are copied. Secret societies have no place in the high school and should not be tolerated. Class yells and class colors and excessive class spirits are very frequently BREEDERS OF ROWDYISM.

It is not the intention at all to convey the impression that there is to be no FUN OR JOY in the high school. On the contrary, every day should be full of joy and cheer that come with doing good work and living for something that is worth while.

CLASS "SCRAPS," HAZING AND ROWDYISM ARE NEITHER HUMOROUS NOR CONDUCIVE TO REAL MANHOOD AND WOMANHOOD.

Athletic work has assumed a place in the school world that is simply OUT OF ALL PROPORTION TO ITS MERITS. It has taken possession of our colleges and universities to such an extent that in the student world an institution is judged by its athletics. But there is a tendency just at present on the part of some colleges and universities to throw off the yoke. This intense athletic spirit has taken hold of some of our high schools and in some instances seems to be the DOMINANT FORCE.

However, every high school should be equipped with a good gymnasium and the boys and girls should have constant systematic training in PHYSICAL CULTURE. This training should be supplemented with play. Interclass games can be made healthful and helpful sport and can be kept secondary to the real purpose of school life.

NATURE STUDIES.

PROFESSOR L. H. BAILEY OF CORNELL WRITES ON SUBJECT.

He Thinks Farmers Should Not Be Impatient In Demanding Concrete Results, but Rather Make Haste Slowly and Permanently.

[Special Correspondence.]

There is now a decided movement looking toward the introduction of agriculture and related subjects into the public schools. More than thirty of the states and territories have taken some kind of official action in this regard. Just how these subjects are to be introduced is not yet determined, and it may be several years before any efficient body of agricultural thought is introduced into the greater part of the public schools. There is no question, however, that this introduction is sure to come. The whole tendency of our civilization is to put the educated man into the work of the world and to give every person a training for efficiency in the life in which he is to engage.

All this does not mean that we are to neglect the fundamental principles of education. Rather we are to work out the fundamental principles of education in a new way. We are to work them out in terms of other subjects from those that we customarily have used. I doubt whether distinct separate courses in agriculture will be found to be practicable in most of the elementary schools. In the primary grades the nature study idea will be the leavening influence, putting the child directly into touch with the things with which he lives. The nature study movement endeavors to use common affairs and objects and phenomena as means of training the mind.

In the intermediate grades the probability is that agriculture will be taught by giving agricultural applications to the general fundamental subjects that already are in the course of study. We have introduced too many subjects into the schools. We need to simplify rather than to complicate the school course, but we can introduce local applications in the studies that are now a part of the school work. For example, after the fundamental work in number is acquired the problems can be very largely local. There are sufficient agricultural arithmetical problems to afford all the drill and practice that are now afforded by the copartnership and middleman problems that are in use in the schools. The geography teaching now attempts to begin with the local environment. A good part of this local environment is the farms, and a good deal of the farming can be taught in the geography class. Manual training can be given an agricultural trend when necessary. The same can be said of drawing and other subjects.

When the high school is reached, separate optional courses in agriculture may well be given as soon as teachers and facilities are provided. This work should be of a scientific character, of equal training value with physics or chemistry or botany, and it should lead directly to entrance credits in the agricultural colleges and universities.

I believe in every effort that tends to arouse the public to the necessity of introducing these subjects into the schools, and I shall use all my efforts to extend the sentiment. However, I hope that the farming population will not be too impatient in demanding concrete results or in forcing formal agricultural subjects into the schools. We must make haste slowly and in doing so make it fundamentally and permanently. We must not forget that schools are schools and that their general tone must be elevated and their general efficiency increased before we can hope for any successful results in the teaching of common life subjects. Merely to introduce agriculture into the rural schools as they exist at the present day will be of no particular consequence. The whole tone of the school must be raised. This elevation must come from the elevation of the sentiment in the community. More money must be had for the schools in order that better facilities and better teachers may be employed and the whole atmosphere of the school be made attractive.

L. H. BAILEY.

Grip Quickly Knocked Out.

"Some weeks ago during the severe winter weather both my wife and myself contracted severe colds which speedily developed into the worst kind of la grippe with all its miserable symptoms," says Mr. J. S. Egleston of Maple Landing, Ia. "Knees and joints aching, muscles sore, head stopped up, eyes and nose running, with alternate spells of chills and fever. We began using Chamberlain's Cough Remedy, aiding the same with a double dose of Chamberlain's Stomach and Liver Tablets, and by its liberal use soon completely knocked out the grip." Sold by Farmers Union, Agent.

HONEST DENTISTRY

It is only a matter of simple calculation to show that good dentistry can be given with low prices.

It is the dentist who has only a few patients that must charge high prices.

The dental office that is kept busy can easily afford to give lower rates. It is only another kind of quick sales and small profits.

7423 Patients Recommend Us.

We employ none but skillful dentists of long experience. Our methods are guaranteed to be absolutely painless and perfectly antiseptic. No charge for extraction of teeth unless they are painlessly removed. Where the patient orders a plate we do not charge for necessary extractions. We restore decaying teeth, we replace lost teeth and beautify sound teeth.

We guarantee for fifteen years our plates and bridge work to fit, to be comfortable, serviceable and natural.

A discount of 10 per cent to out-of-town patients who pay railway fare to San Francisco.

PRICES:

Perfect-Fitting Plates	$3.00
Pure Gold Crowns	2.50

EASTER EXERCISES.

Appropriate and Interesting Programs at Both of the Churches.

At the Methodist church in the morning the pastor preached an appropriate sermon on the "Risen Christ." There was special music by a choir of young ladies, under the leadership of Mrs. E. C. Hurlbert. Seldom, if ever, has there been sweeter music of this character in the church. Those who compose the choir are: Misses Florence Kennedy, Grace Blodgett, Cora Rodeck, first sopranos; Zena Kennedy, Tillie Hayes, Emma Beattie, second sopranos; Irene Pannell, Madge Clendennin, Minnie Canine, altos. Mrs. Hurlbert, organist.

In the evening were the usual Easter exercises, under the direction of the Sunday school, as follows: Hymn; prayer, Rev. A. H. Needham; Chorus, "Hail to the Conquering Christ," school; Solo, "Buds of Promise," Winnie Bibb; Recitation, "Flowers of Spring," Ruth Hayes; Chorus, "Resurrection Power," school; Exercise by the girls of Mrs Parker's class and the boys of Mrs. Doolittle's class; Song, "Springtime," Mrs. Hanger's class of girls; Recitation, "Soul's Awakening," George Beaver; Song, "Lily Song," Mrs. Parker's class of girls; Remarks by the Pastor; Chorus, "Love Triumphant," school.

The church presented a very pleasing appearance, with the clusters of lillies—some 250 in number—palm branches and other flowers and vines.

At the Congregational Church the exercises were held in the morning, being as follows: Voluntary, verging into the Doxology; Invocation, Rev. Geo. E. Atkinson; Song; Scripture selections, Misses Alba Carter, Jessie Joy, Mildred Duncan; Anthem, choir; Recitation, Dolly Mapes; Prayer, Dr. Wm. Windsor; Notices and offering; Solo, Mr. Sadler; Exercise by primary class; Exercise by Miss Lillian Smith's class; Song by primary class; Talk, Dr. Windsor; Remarks, Rev. Geo. Atkinson; Anthem; Hymn; Benediction.

The church was very prettily decorated, two large crosses made of lillies being conspicuous, and the festoons of smilax were very artistically arranged.

Editor and Family on a Short Vacation.

The editor, with his wife and daughter are taking a week's vacation, visiting relatives and friends in Los Angeles, Riverside, Pasadena, Whittier and other Southern California points. This week's PRESS is printed ahead of time (but not mailed) in order to allow the writer to be present in Los Angeles Wednesday morning to attend the Democratic State Central Committee meeting, he being the representative from this Assembly District. The question as to where the next State convention will be held will probably come up, as well as matters appertaining to the fall State election. Wednesday evening the committee will be the guests at a hotel banquet where 300 covers are to be spread, at $2.50 a plate, tendered by the Democratic Club of Los Angeles.

Therefore, if we are a little shy on local news this week, please remember that the paper was printed before the news happened, and that next week we will try to gather up the stray items.

Dr. C. R. Brown, pastor of the First Congregational Church of Oakland, and having a national reputation as a speaker and lecturer, will deliver a lecture on "The Greatest Man of the Nineteenth Century" in the Campbell Congregational Church May 7, 1906.

TWENTY YEARS AT CAMPBELL.

Charles Berry the First and Only Station Agent to Serve Our People.

It was twenty years ago Monday at 10:30 when Charles Berry reported out his first train from Campbell, and that can really be called the beginning of the town of Campbell. On that day he, as a young man, was sent here by the railroad company from Alviso to report out construction trains which were used in the building of the line to Almaden, not expecting to keep him here longer than the time necessary to complete that piece of road building.

When he landed at the flag station, a cheaply constructed affair not much larger than a dry goods box, (so light that the wind blew it over) he was ready for something to eat and a place to sleep. Nothing but fruit orchards loomed up before him. Soon "Uncle Ben" Campbell came down to get a mail bag (the postoffice was at his home) which was thrown off of a passing train. Berry accosted him and asked where he could find a place to stay. He was taken over to the late Mr. Swope's, (where Whitman's store now stands) with whom he boarded nine months.

As stated above the railroad had no intention of making this a station, but after a month here, his office fixtures being a telegraph instrument set on a cheap table—nothing else, not even paper, pencil, pen or ink—he made a requisition for some tickets, believing he could sell them. The railroad people laughed at first but yielded and sent the tickets. The first month's sales amounted to the munificent sum of about $5. Not satisfied at this, Berry wanted them to make it a freight depot. This took lots of persuasion and patient waiting. Finally Mr. Steeple came out from San Jose and investigated, and sent a complete freight outfit, thereby giving Campbell a bonefide existence, making it possible for the few residents surrounding here to ship and receive goods.

The town grew, the business grew, and the railroad company left Charles here. We're glad they did, and we believe all our people are glad, for who is there in this section that does not know and trust him? His parents moved here from Santa Clara and they built and settled near where the bridge is. In 1889 Jupiter Pluvius tried to make Baptists of them by immersion and to save their house (half their lot being washed away) they moved the house to what is now South Central avenue, Mr. Parker living in the house if we remember correctly.

Soon after Charles took to himself one of New Hampshire's fair daughters and happiness and prosperity has been their portion. May the next twenty years be as pleasant. Charles is in line for promotion, of which we hope to write next. When he reads this we will be a safe distance away—500 miles.

I. O. O. F. Notice.

To the Noble Grand, Vice Grand, Officers and Members of Morning Light Lodge, No. 42, I. O. O. F.—

DEAR SIRS AND BROTHERS:—You and sojourning members of the order are requested to meet at I. O. O. F. Hall in Campbell, Cal., Sunday, April 22, 1906, at 7 o'clock p. m. to attend in a body anniversary services at the Congregational Church.

C. W. GREENE,
Noble Grand.

R. E. GATES,
Secretary.

CAMPBELLITE IN ACCIDENT.

Chauffeur Edmund White and Others Have Narrow Escape from Explosion.

The following telegram from Berkeley is of special interest since it pertains to Mrs. Paul Needham, daughter-in-law of Rev. and Mrs. Needham, the chauffeur being Edmund White. The dispatch follows:

BERKELEY, April 14.—With their automobile spouting flame from a broken engine and threatening every moment to envelope them in the burning gasoline, Mrs. Paul Needham and Miss Olive Morrish this afternoon jumped from the tonneau to the pavement on Center street, while the machine scattered the crowds of students returning from the intercollegiate baseball game.

The car, which was driven by E. White, turned into Center street and was running slowly, on account of the crowd, when the engine broke and the gasoline was fired from the pilot fire. The flames burst from the front of the machine and were blown back over the tonneau, enveloping the two women in fire. The chauffeur succeeded in escaping unharmed

Word received here by Rev. Mr. Needham and Mrs. White states that no serious damage was done, either to the occupants or the car, which was fortunate.

San Mateo Fails to Show up.

The San Mateo basketball team failed to show up last Saturday to play our high school team. All arrangements had been made for the game, including a delicious "spread." Of course with a hungry lot of students and professors around the food was not allowed to go to waste but it is aggravating to be thus disappointed—especially as it is the third or fourth time with that team. Is it possible they get "cold feet" when the prospects of winning are not the best? We understand that the local team will not make another date with the San Mateo team this year.

Rather than disappoint the spectators altogether, a game was played between the first and second teams of the school, the former winning by a score of 7 to 0. Five of the scores were made by Madge Clendennin and two by Earnestine Kennedy.

The Sunnyside Social Club met on last Thursday, week, at the home of Mrs. Austin. Each member was to come attired in special costume. They came all right and the variation was from the sublime to the ridiculous—from the belle to the hobo—and each playing well their part. Games were played and at the close cake and coffee were served.

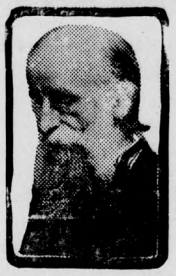
Mr. and Mrs. E. Eilendar of San Francisco have been visiting with Mr. and Mrs. Ed Gilman. Mr. Eilendar has been in the employ of the Southern Pacific Co. for some 16 years.

L. D. Downing has purchased a "Red Devil," as they would say in Texas. He bought L. H. Sly's two seater auto and now "Dow" goes sailing along like the rest of the millionaires.

The special services will commence on Sunday morning next at the Methodist church, under the leadership of Miss Fassett. All are cordially invited.

The Normal Class and Teachers Meeting met at the home of Rev. and Mrs. Needham last Monday evening.

The Big Pickpockets Are the Speculators



By Dr. LYMAN ABBOTT

THE portraits of the BIGGEST PICKPOCKETS of the country do NOT HANG IN THE ROGUES' GALLERY. The man who TAKES MONEY WHICH HE HAS NOT HONESTLY EARNED from the pockets of the people at the gambling table or IN THE SPECULATOR'S SHOP or in the industry in which young children are ground up in the sweatshop in order to supply cheap goods is FAR MORE A ROBBER than the petty thief on the streets.

In the life of the baby, the child and the young man we recognize that things are made for the baby, the child and the collegian, but when the young man leaves college and enters business this whole order is reversed and OUR AMERICAN PEOPLE SEEM TO ACCEPT it as a truth THAT MAN WAS MADE FOR THINGS and the MEASURE OF A MAN IS THE AMOUNT OF MONEY that he makes.

What a curious phenomenon this is, but that it is true of many of our people no one of you can doubt.

IF WE ARE TO ACCEPT IT AS TRUE, LET US CHANGE THE STARS IN OUR FLAG TO DOLLAR MARKS AND OUR MOTTO FROM "IN GOD WE TRUST" TO "BE SUCCESSFUL HONESTLY IF YOU CAN, BUT BE SUCCESSFUL."

I was recently talking with a noted lawyer in New York, who told me that for a large number of wrong and immoral methods of business practiced in New York city to a large extent THERE WAS NO PUNISHMENT IN THE STATUTES of that place. The law was codified years ago, and since then both the law and crime have increased, but crime has outstripped the laws. Can it be said that mon —the badge of ability to discern between THE DISHONEST THAT IS ILLEGAL AND THAT NOT ILLEGAL—is a sign o character?

I have heard temperance orators say that the saddest tragedy of life was that offered by a bright young man going forth into the world and blasting his hopes by drunkenness. But it seems to me that the picture of a young man leaving college WITH HIGH IDEALS OF MANHOOD AND LIFE, entering business and there learning to conform to business standards, LOSING HIS CONSCIENCE AND MORAL DISCERNMENT, is a far sadder tragedy and one as frequently if not MORE FREQUENTLY SEEN than the other.

The Criminal Failure Of the Capitalist Class

By JACK LONDON, Novelist and Socialist

IT is time to take THE STUPENDOUS REVOLUTION now upon us into consideration. The greatest count in the indictment against the capitalist class is that of its mismanagement of society. ITS FAILURE IS HORRIBLE. Its management is INSANE, IDIOTIC AND CRIMINAL. The primitive cave man did not have to live in such squalor as do the modern workingmen.

In the United States there are TEN MILLION PEOPLE WHO CONSTANTLY LIVE IN POVERTY. By poverty I mean that condition in which the mean standard of life cannot be maintained. This is CHRONIC STARVATION and means the intellectual and physical DETERIORATION of a large percentage of our population.
